## Gerflor solutions at Assomption Elementary School

As part of the construction of this new elementary school, special attention was given to material selection to create an environment that fosters learning while combining innovation, durability, and comfort. **DLW linoleum** flooring was selected for its environmental benefits, proven performance in institutional settings, and contribution to overall user well-being.

The design features a harmonious mix of colours: **0554 Concrete Grey** and **0083 Light Grey** form a timeless, neutral base, enhanced with accents of **0023 Turquoise Blue** and **0090 Smooth Grey**, which bring a fresh touch and help with spatial orientation.

Beyond its visual appeal, the flooring offers an enhanced user experience with its underfoot comfort, dimensional stability, matte anti-slip finish, and sound-reducing properties. Resistant to daily wear and easy to maintain, it fully meets the needs of a modern educational facility.

By choosing linoleum made from natural raw materials, the school benefits from a layout that is not only aesthetic and functional but also environmentally responsible — a sustainable investment for future generations.
