Gerflor solutions at Garry Station K-5

Built in the growing Garry Station subdivision, the Garry Station K-5 Elementary School was designed to accommodate up to 610 students, with future expansion capacity for 12 modular classrooms. The school was designed to offer young students a safe, welcoming, and nurturing learning environment.

To meet the needs of a vibrant educational setting, **DLW Landscape** collection was selected for its durability, low maintenance, and creative design potential. A neutral palette using **0053 Ice Grey**, **0050 Quartz Grey**, and **0059 Plumb Grey** established a calm and modern foundation throughout classrooms and hallways.

DLW Landscape was chosen for its durability, ease of maintenance, and strong performance in high-traffic areas. It resists indentation, supports acoustic comfort, and maintains dimensional stability—key features for a busy school environment.

Bright accent colors like **0073 Spicy Orange** and **0072 Golden Yellow** were strategically incorporated to energize the space and help define zones and guide movement throughout the building.
