Gerflor solutions at the New Residence Hall at McGill

As part of the expansion of student housing, McGill University recently inaugurated a new residence hall designed to offer a safe, modern, and functional living environment for its student population.

McGill University selected **Tarasafe Plus** for the new residence hall. Known for its excellent slip resistance and durability, the product was installed in kitchen zones and surrounding corridors—areas prone to moisture and spills. The **7386 Savana** colour offered a neutral, clean look that complemented the modern design of the facility while meeting practical performance needs.
