BROME-MISSISQUOI REGIONAL COUNTY MUNICIPALITY, QC | 2025

Gerflor solutions at the New Elementary School

The new elementary school was built in 2025 as a to support the growing population of families in the Brome-Missisquoi region of Quebec. Designed with a focus on sustainability, durability, and aesthetics, the new facility was created to offer a safe and engaging learning environment for students from kindergarten to sixth grade.

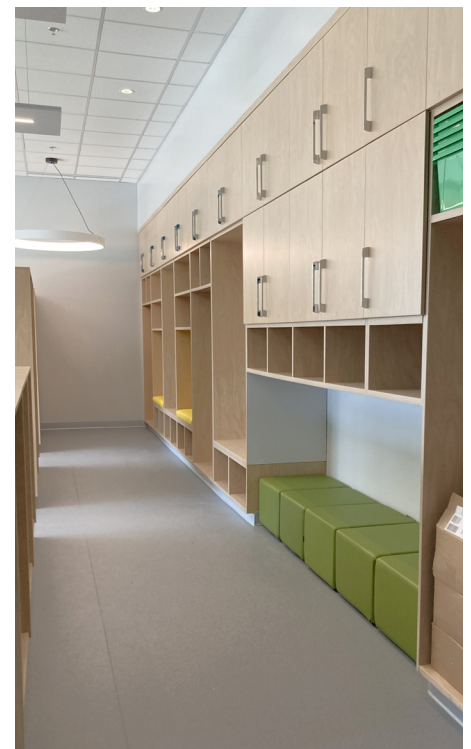

As a newly constructed school, the project required flooring solutions that could meet high performance demands across educational, administrative, and common areas—ensuring resilience, hygiene, and design continuity throughout.

To meet the needs of this modern facility, Gerflor's **Mipolam Affinity** flooring was selected in two complementary finishes: **4459 Grey Storm** and **4430 Pearl Grey**, for a total of **3,235 yd²**. **Mipolam Affinity** is a homogeneous vinyl flooring designed for high-traffic environments like schools, offering excellent resistance to wear, stains, and chemicals. Its **Evercare™** surface treatment ensures easy maintenance and long-term cleanliness, while the neutral tones help create calm, focused learning spaces throughout the building.

The new school features a bright, clean, and modern interior that reflects the values of quality education and student well-being. With Gerflor's resilient and hygienic flooring in place, the school benefits from a long-lasting solution that supports both visual appeal and daily functional performance—providing a strong foundation for generations of learners.
