Gerflor solutions at Harvest Oak Public School

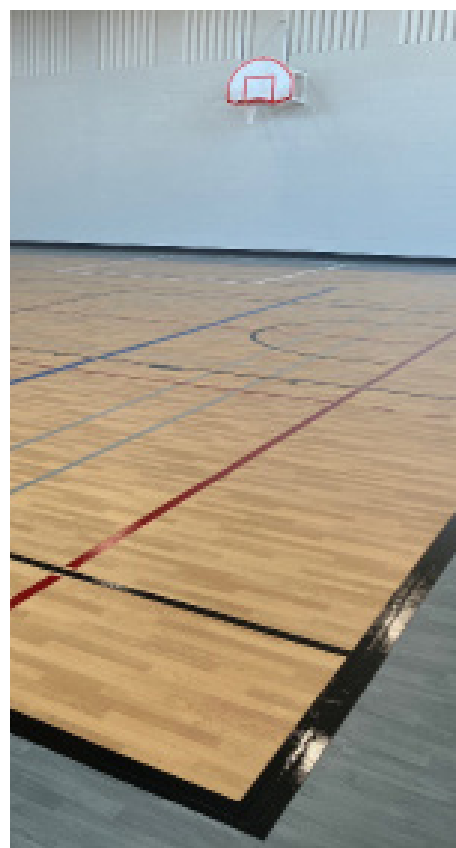

The new Harvest Oak Public School in Oakville, Ontario, was completed in 2025 to accommodate more than 750 students from kindergarten to Grade 8. Designed with a focus on accessibility, sustainability, and student well-being, the facility required versatile flooring solutions to meet the performance and safety needs of classrooms, corridors, and gymnasium spaces.

To meet these goals, Gerflor provided a combination of resilient flooring products that ensure durability, comfort, and design continuity throughout the school. **Creation 70** was selected for classrooms and administrative areas for its wood-inspired aesthetics and long-lasting performance. **Recreation 45** and **Sport M Plus** were installed in the gymnasiums and activity spaces, offering superior shock absorption, slip resistance, and comfort underfoot ideal for both sports and multipurpose school activities.

The new facility features a modern, safe, and high-performance flooring system that enhances both learning and recreation spaces. The combination of **Creation 70**, **Recreation 45**, and **Sport M Plus** delivers a cohesive, sustainable, and visually appealing design that supports student activity, well-being, and long-term operational efficiency.
