Gerflor solutions at the Antoine-Feuillon Residence

The Antoine-Feuillon Residence project included the construction of a new senior living facility in 2021, followed by an expansion in 2024 to accommodate growing demand for high-quality retirement housing. The design focused on creating a safe, comfortable, and welcoming environment that promotes resident well-being and independence. Flooring solutions had to provide durability, slip resistance, hygiene, and a warm residential aesthetic suitable for healthcare and senior living applications.

To meet these diverse needs, Gerflor provided a combination of flooring solutions tailored to each area's requirements: **Nera Pro-Wood Cognac Blond** (2007) – Installed over **5,639 yd²**, this wood-look heterogeneous flooring offers a natural aesthetic, excellent acoustic performance, and easy maintenance, ideal for resident rooms and common areas. **Tarasafe H2O Seashore** (7325) – Installed over **2,455 yd²** in bathrooms and wet areas, this safety flooring provides outstanding slip resistance (R11) and waterproof properties, ensuring security and hygiene for residents. **Taralay Impression Habana Trinidad** (1069) – Installed over **2,967 yd²** in corridors and multi-purpose spaces, this resilient flooring delivers durability, comfort underfoot, and refined visual appeal, perfectly suited for high-traffic environments.

The Antoine-Feuillon Residence now features a cohesive, modern, and functional flooring design that combines comfort, safety, and aesthetic harmony. Each Gerflor product contributes to the overall well-being of residents and staff by ensuring a clean, secure, and welcoming atmosphere —providing a long-term, sustainable solution for this growing senior living community.
