Gerflor solutions at Val-des-Brises Long-Term Care

The CHSLD Val-des-Brises, located in Laval, Quebec, officially opened in 2022. This new long-term care facility was designed to accommodate 232 residents, many of whom are living with moderate to severe neurocognitive disorders. The project's primary goal was to create a secure, comfortable, and soothing living environment that promotes dignity and well-being, while meeting the highest standards of healthcare design, safety, and infection control.

To meet the performance and aesthetic requirements of this specialized care facility, Gerflor provided a range of high-quality flooring solutions tailored to each functional area: **Taralay Impression Habana Vinales (1070)** – Installed over **13,000 yd²** in corridors, dining rooms, and resident common areas, this flooring offers exceptional durability, acoustic comfort, and a welcoming wood-inspired design. **Taralay Impression Herringbone Blond (0722)** – Installed over **2,000 yd²** to add visual warmth and texture, enhancing wayfinding and providing a residential feel. **Taralay Impression Habana Trinidad (1069)** – Used over **300 yd²** in accent areas to create contrast and support spatial orientation for residents. **Tarasafe Standard (7618)** – Installed over **470 yd²** in service and utility areas, offering superior slip resistance and resilience for high-traffic conditions.

The CHSLD Val-des-Brises now features a harmonious, functional, and therapeutic flooring design that enhances resident safety and comfort. The combination of **Taralay Impression** and **Tarasafe Standard** products provides a durable, hygienic, and easy-to-maintain solution, while the warm and natural aesthetic contributes to a homelike, reassuring atmosphere that supports both residents and healthcare staff.
