Gerflor solutions at Northern Heights Community

Northern Heights Community in North Bay, Ontario, opened in 2024 as a **modern senior living residence** offering comfortable accommodations with scenic views of downtown and Lake Nipissing. The facility required high-performance flooring that supports mobility, safety, hygiene, and a warm residential atmosphere throughout its living areas, corridors, and service spaces.

Gerflor supplied three main flooring collections tailored to the needs of a modern senior living environment.

Taralay Impression was installed throughout most resident rooms, corridors, and shared spaces, offering a warm residential aesthetic, strong durability for high-traffic areas, and comfortable acoustic performance with easy maintenance. **Nerok** was used in select multipurpose zones where added strength and contemporary visuals were required, providing excellent stability and long-term resilience. For wet areas, kitchens, and high-risk spaces, **Tarasafe Standard** and **Tarasafe Ultra** delivered exceptional slip resistance, waterproof performance, and hygienic maintenance—ensuring maximum safety and reliability for both residents and staff.

Taralay Impression Habana 3D Trinidad (1069) covered 1,550 yd² in resident living areas and common spaces, providing warmth, elegance, and long-lasting durability. **Pure Wool Teal (1074)** added 95 yd² of accent areas with calming, contemporary contrast, while **Gentleman Black & White (1067)** brought 1,800 yd² of modern visual interest for feature zones and improved wayfinding. **Habana 3D Vinales (1070)** was used across 4,100 yd² of corridors and shared spaces, offering exceptional traffic resistance and a welcoming residential feel. **Nature Oak Clear (1055)** added 420 yd² of natural wood aesthetics and acoustic comfort in select rooms.

Nerok Pixel Silver (0597) provided 345 yd² of added durability and sleek design in specialized spaces. For safety-focused areas, **Tarasafe Standard Savana (7386)** covered 1,300 yd² in kitchens and utility zones with high slip resistance, while **Dove Grey (7767)** added 1,150 yd² of durable, low-maintenance flooring in service corridors. In wet environments, **Tarasafe Ultra Aqua (4463)** supplied 500 yd² of R12 slip resistance, complemented by 440 yd² of **Tarasafe Ultra Granite (8709)** for maximum waterproof safety in additional wet zones.

Northern Heights Community now features a cohesive, modern, and safe flooring system that enhances comfort, accessibility, and aesthetics across the entire residence. The combination of **Taralay Impression**, **Nerok**, **Tarasafe Standard**, and **Tarasafe Ultra** provides a warm, residential atmosphere while delivering the durability, hygiene, and slip resistance essential for senior living environments. The result is a beautifully designed facility that supports resident well-being, staff efficiency, and long-term operational performance.
