Gerflor solutions at Peach King Centre

Gerflor's **Recreation 60** was selected to meet the demands of high-traffic recreational spaces. **Canadian Maple (6062)** was installed over **2,018 yd²**, providing a classic wood-look aesthetic, Class 2 shock absorption, and comfort underfoot. **Verde (6556)** and **Gray (2711)**, installed over **700 yd²** and **551 yd²** respectively, were used to create visual zoning and enhance the overall design while maintaining consistent performance and durability across the facility.

The upgraded facility now features a durable, high-performance sports flooring system that supports a wide range of recreational activities. The colours add visual energy and clear zoning, while the resilient surface ensures comfort, safety, and long-term performance for community users.
