Gerflor solutions at Pryde Aquatic and Wellness Centre

The Pryde Aquatic and Wellness Centre was developed as a modern, state-of-the-art facility designed to support a wide range of fitness, recreation, and community wellness activities. The project required high-performance flooring solutions capable of withstanding intensive use while providing safety, comfort, and durability in active environments.

Gerflor's **Taraflex Sport M Plus** was selected for its proven performance in sports and multi-use facilities. **Wood Oak (5742)** was installed over **1,230 yd²**, delivering a natural wood-look aesthetic, excellent shock absorption, and superior comfort underfoot. **Anthracite (6873)** was installed over **200 yd²** to create visual contrast and define activity zones while maintaining consistent performance across the surface.

With its easy maintenance and long-term durability, the flooring solution is well suited to the demands of a modern, high-traffic wellness environment.

The facility now features a safe, durable, and visually appealing sports floor that supports a wide range of activities. It delivers consistent performance, enhanced comfort underfoot, and strong resistance to wear, helping improve the overall user experience.
